<b>High School Examination</b> Distinction (90%) Indian School Certificate (ISC) Jamnabai Narsee School - Mumbai, India	June 2013 - May 2015
<b>Secondary School Examination</b> Distinction (92%) Indian Certificate of Secondary Education (ICSE) Jamnabai Narsee School - Mumbai, India	June 2009 - May 2013

## Projects

### Scotland Yard Game Project

A two member team worked on a project using Java that involved creation of the model of the Scotland Yard board game to complete the provided MVC framework and yield a playable version of the game.  
The second part of the project was to design an AI system to play the game and so we employed the Monte Carlo algorithm to pick the best move from the game tree. Additionally used ThreadPools and other classes from the Concurrent package to improve performance along with heuristically scoring each board.

### Manor Hall JCR Website

Created the website for the Manor Hall Junior Common Room Committee, which is in charge of the activities for the residents of the Manor Hall of Residence of the University of Bristol. Used the Polymer framework to create custom web components and pull data from a Firebase database. It also uses a ServiceWorker where supported to provide offline capabilities.

### Bettering Magazine Website

Created the website of Bettering Magazine, a non-profit magazine based in Bristol which helps local charities.

## Involvements

<b><u>DigiMakers Bristol</u></b>	October 2015 - present
Conducts workshops for children aged 7 – 17 where they are given an introduction on creating websites using Bootstrap
